## **DETAILED ACTION**

### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

Patentability seen in, although not limited to Independent Claim 5: the method of playing a word game comprising of rolling a first, second, and third 20-sided die and displaying a consonant on top of each die as they are rolled. Each die has all twenty English alphabet consonants except for "Y", one consonant on each side of the 20-sided die. Furthermore, forming a word with the three consonants displayed by the three dice and awarding points based on the sequence in which the consonants are formed within the word. The closest prior art of record does not teach or fairly suggest the claimed method in combination. Marzoni (US 4,055,348) discloses a word game that comprises of forming a word upon the roll of five 20-sided die with all twenty English alphabets amongst the dice. However, Marzoni excludes each die having all twenty English alphabet consonants except for "Y", one consonant on each side of the 20-sided die and also fails to disclose awarding points based on the sequence in which the consonants are formed within the word. Koopman (US 6,824,136) discloses a word game that comprises players using five six-side die. The dice include a six-sided die containing the vowels of the alphabet including Y (one vowel on each face) and the other dice include all the consonants of the alphabet as a whole. A player uses the dice to formulate words and accumulate points within the game. However, Koopman fails to teach using three 20-sided die and explicitly awarding points based on the sequences the consonants are used to formulate the words.
